The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply									
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).  Status

## **DETAILED ACTION**

Claims 1-43 are pending in this application. Amended claims 1, 3, 6, 9, 13, 33 are noted.

The amendment dated 6/6/03 has been entered and carefully considered. The examiner appreciates the amendments to the specification and claims. In view of said amendments, the objection to the specification, the 112 rejections, and the previous art rejection have been withdrawn.

## Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marijnissen et al. (5,876,860) or Schmitz et al. (5,993,980). Marijnissen discloses a method and apparatus for forming a multilayered ceramic topcoat of a thermal barrier coating system onto a superalloy substrates for use in gas turbine engines (col.1 lines 5-15). Specifically, the bond coat is applied by low pressure or vacuum plasma spray (col.7 lines 54-57) or by EB-PVD in vacuum (col. 10 lines 63-65) followed by a subsequent heat treatment step in vacuum (col. 14 lines 39-43).

Schmitz discloses a method of applying a MCrAlY protective coating for protecting a component from corrosion and oxidation in gas turbine components (col.1 lines 16-40, 64-65). A metallic adhesion-promoting layer is applied by vacuum plasma spraying followed by a heat treatment step in vacuo (col.6 lines 46-65).

However, the reference fails to teach using a vacuum plant.

Art Unit: 1762

It is noted that the references clearly teach the use of a vacuum. One skilled in the art would realize that a vacuum can be achieved in any appropriate container. It would have been obvious to utilize a vacuum plant because the references teach the benefit of utilizing a vacuum plant and there would have been an expectation of obtaining the same benefits.

In claims 2-8, the applicant requires a specific temperature, transferring procedures, and materials. It would have been obvious to one having ordinary skill in the art to have determined the optimum value of a cause effective variable through routine experimentation in the absence of a showing of criticality.

In claims 9-16, the applicant claims a specific apparatus. It is noted that both reference teach the use of a coating chamber and a postheat chamber in vacuum. However, the references fail to teach a vacuum plant. This issue has been addressed above.

The limitations of claims 17-43 have been addressed above.

## Response to Arguments

Applicant's arguments with respect to claims 1-43 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Application/Control Number: 09/914,839 Page 4

Art Unit: 1762

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to B. Chen whose telephone number is (703) 308-3809. The examiner can normally be reached on 10 hour days.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shrive Beck can be reached on (703) 308-2333. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0661.
